Exoskeleton

CareExo Lift

ACTIVE

Special handles on the hips and shoulders **provide support** and make it easier to **treat the patient with respect**. This can actively contribute and feels part of the action, for example when lifting out of bed or in a wheelchair.

RELIEVING

Routine body movements can be optimized thanks to the **ergonomic fit**. This makes kinesthetic work easier. Less strain and mindful posture **reduces back problems**.

FLEXIBILITY

Interchangeable handles and washable materials enable easy cleaning and **compliance with hygiene rules**. Suitable for almost all body types due to adjustable straps, it allows **practical and long-lasting** use in everyday care.

SoftExo

BACK BRACE

Keeps your back straight.

ELASTOMERS

Flexible straps for force distribution.

BELT

The core of the SoftExo.
